ISO 14001:2015 Environmental Management Systems - The Gap Analysis Checklist

This gap analysis checklist is prepared for use in evaluating your Environmental Management System (EMS) against the requirements of ISO 14001:2015. Each requirement is expressed as a question that the user (auditor / assessor) can use to evaluate your EMS capabilities. You will need to have a copy of the ISO 14001:2015 standard to use along with this checklist so that you can refer to the requirements and the guidance sections of Annex A.

After you have prepared an audit schedule, and assigned responsibility to your auditors for different areas or processes to audit, copy each section of the checklist for the auditors working with that section. As you work through the checklist take notes on what is in place, and what needs to be developed. Reference the procedures or other documents that you have reviewed and that will provide information for the new EMS. Take notes on the status of the documents; will they need to be revised for the new system, or can they be used as is? Also note where processes are in place, but documentation is needed. Focus on what is in place, and what needs to be developed.

While you do want to know if procedures and processes are being complied with, compliance is not your main focus for this audit. Remember that the final outcome of this audit should be a list of things that your company needs to do to comply with ISO 14001:2015.

---	ENVIRONMENTAL MANAGEMENT SYSTEMS	Currently in Place	Compliant Yes / No	If No - % Completed	Items Needed
4	CONTEXT OF THE ORGANIZATION				
	<p style="color: blue;">This clause introduces two sub-clauses relating to the context of the organization, (1) understanding the organization and its context and (2) understanding the needs and expectations of interested parties. Together they require that you determine the issues and requirements that can impact on the planning of the EMS. In addition the scope of the EMS needs to be determined and the Environmental Management System established, implemented, maintained and continually improved.</p>				
4.1	Understanding the organization and its context				
	<p>Has your company determined the external and internal issues that affect your ability to achieve the intended outcomes of the Environmental Management System (EMS)?</p> <p>Have you included such issues as environmental conditions being affected by or capable of affecting</p>
